IN THE CLAIMS

Please delete claim 1-34

Please add the following claims:

35.   A system for accessing and presenting asset information on a graphical user interface comprising:

a plurality of assets each stored in a single location in a database wherein each of the assets has a profile associated therewith and each of the profiles includes at least one hierarchal identifier;

at least one page presentable on a user interface, said at least one page being accessible over a data network and including a listing of hierarchal identifiers which are user selectable;

a search and compile apparatus, which in response to a user selected hierarchal identifier from the at least one page, performs a search of the profiles and identifies the assets which includes the selected hierarchal identifier; and

a user interface page generator which based on selections made by a system user dynamically generates one or more pages which include selected data for the identified assets, wherein the one or more pages are presentable on a user interface device and configured such the selected data for the identified assets is further selectable by a system user and associated data for the selected process asset is presentable on the user interface device.

36.   The system of claim 35 wherein the assets are processes and procedures for an organization.

37.   The system of claim 36 wherein the hierarchal identifier includes at least one of: a tier designation associated with a particular organizational level, a functional area, a certified asset designation, a sample asset designation, draft asset designation, a serial number, and a
